

WHAT PEOPLE ARE SAYING

"I believe that the H.U.T. strap is one of the most innovative pieces of training equipment of our time. It does three things—it promotes the performance and safety of a player as well as promoting following the rules. If the head of a player is down, he can't take in information. That process between the eyes and the brain is interrupted."

— *Chris Yeager*
Head football coach of Mountain Brook

"When used properly the H.U.T. Strap can be a beneficial training tool. The H.U.T. Strap does not restrict, limit or otherwise alter the wearer's range of physical motion."

— *Dr. Lawrence Lemak*
ASPIRE Sports Institute and National
Center for Sports Safety

MEET OUR FOUNDER J. KEN THOMPSON

The HUT (Heads Up Training) Strap is the first and only "heads up" training tool. When worn it provides athletes with proprioception, bio-feedback and muscle memory during participation in contact sports. Because of its utility as both a safety and performance tool it is recommended for all levels of play. The HUT Strap is made from durable military grade nylon webbing, and it comes with a lifetime warranty. Made in U.S.A.

*Now backed by the National
Center for Sports Safety.*

H.U.T.

HEADS UP TRAINING

IT'S A GAME CHANGER

HOW IT WORKS

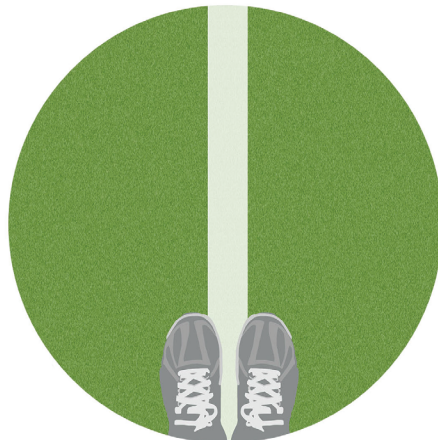

1. Adhere adhesive Velcro strips to both the rear shell of the player's helmet and shoulder pads.

2. Secure the upper piece of the H.U.T. strap (shorter) to the Velcro located on the helmet. Then secure the lower piece (longer) of the H.U.T. strap to the Velcro on the shoulder pads.

3. Fasten both ends of the H.U.T. Strap using the safety release clasp.

4. Adjust the straps so that the player can lower his head just to the point that he can see to the top of his feet without uncoupling the clasp.

WHAT YOU GET WITH H.U.T.

**PROPRIOCEPTION
BIO-FEEDBACK
MUSCLE MEMORY**

Visit hutstrap.com/store to purchase your team's H.U.T. straps! For a single purchase, each strap costs \$40/strap.
